NO$CAMCOIN (NSC)

A Revolutionary Project Against Scammers & Scam Coins

WHITEPAPER
V 1.0.1

TABLE OF CONTENTS

NO$CAMCOIN (NSC)

PREFACE

1.   Virtual currency has been a hot topic for over a decade now. With so much recent news, it can be difficult to fully understand the significance and overall purpose of this expanding market. The task is made easier, however, by knowing the history of the most widely-traded crypto on the market: Bitcoin.

2.   Bitcoin was first introduced in 2008 as a decentralized currency without the need for a central bank or any intermediaries. It can be sent to and from users via the bitcoin network, a peer-to-peer network in which transactions are authenticated by nodes and recorded on a blockchain.

3.   Over the years, numerous crypto projects and blockchain technologies have come up and majority of them are doing exceptionally well. It has helped to resolve many issues, ease business and store data. However, every good has been overshadowed by bad thing, negativity and drawbacks. So, is Cryptocurrency; and one of the major worst thing that Cryptocurrency market is affected is due to "SCAMS" & "SCAMMERS".

4.   Crypto scams have been around since crypto started. Some scammers got away with serious money, running into the billions of USD worth. It's one of the drawbacks of having a mostly unregulated financial sector. The people behind these crypto scams are creative. They find various ways to separate you from your digital assets. Some of these crypto scams were very successful as well.

5.   If we take a closer look at 10 major crypto scams, like Onecoin, Thodex, Anubis DAO, Squid Game, Mutant Ape Planet NFT, Luna Yield, StableMagnet, PlusToken, WoToken and BitConnect. Scammers around the world took home a record $14 billion in cryptocurrency in 2021, thanks to large part to the rise of DeFi. Losses from crypto-related crime rose 79% from 2020, cryptocurrency theft increased 516% from 2020, to $3.2 billion worth of cryptocurrency. Of this total, 72% of stolen funds were taken from DeFi protocols. Scamming was the greatest form of cryptocurrency-based crime in 2021, followed by theft — most of which occurred through hacking of cryptocurrency businesses. The firm says that DeFi is a big part of the story for both, in yet another warning for those dabbling in this emerging segment of the crypto industry.

6.   The IRS Criminal Investigation agency said that it had seized more than $3.5 billion worth of cryptocurrency in 2021 — all from nontax investigations — representing 93% of all funds seized by the division during that time period. Other wins for law enforcement in 2021 included the Department of Justice's $56 million seizure in a cryptocurrency scam investigation, $2.3 million seized from the ransomware group behind the Colonial Pipeline attack, as well as an undisclosed amount seized by Israel's National Bureau for Counter Terror Financing in a case related to terrorism financing.

NO$CAMCOIN (NSC)

7.	In 2023, over $2 billion was stolen by *cryptocurrency scammers*. This is about half the estimated $4.2 billion lost to crypto scams in 2022. Crypto scamming and hacking revenue both fell significantly in 2023, with total illicit revenue for each down 29.2% and 54.3% respectively.

8.	But how do you keep your crypto safe in this high-tech Wild West?

9.	This is where NSC steps in. From the grand schemes that shook the world to the sneaky tricks of 2024, we've got it covered.

And The Best Part Is?

"WE ARE NOT STOPPING AT AWARENESS"

NO$CAMCOIN

"OF THE *PEOPLE*, FOR THE *PEOPLE* & BY THE *PEOPLE*"

" Trust, but **Verify.**

RONALD REAGAN

NO$CAMCOIN (NSC)

NO$CAMCOIN (NSC)
The first anti-scam token in the world

1.   INTRODUCTION

1.1   NO$CAMCOIN (NSC) token leverages distributed ledger technology and cryptographic protocols to create a robust anti-scam ecosystem in the cryptocurrency sphere. By harnessing the power of decentralized networks, NSC token aims to become the vanguard of anti-fraud tokens, empowering the community through advanced reporting mechanisms and incentivized participation.

1.2   NSC token emphasizes multi-stakeholder collaboration, leveraging blockchain's inherent transparency and immutability to facilitate information sharing between victims and regulatory bodies. This project is predicated on the principles of distributed trust, user engagement, and cutting-edge technological implementation, offering a unique value proposition for users and investors alike.

2.   TYPES OF CRYPTO SCAMS

2.1   **Cryptocurrency Scams** take many forms. Just as financial criminals will try to steal money from your bank account or put fraudulent charges on your credit card, crypto scammers will do anything to take your crypto. To protect your crypto assets, it helps to know when and how you're being targeted and what you can do if you suspect that a cryptocurrency or any communications related to it are a scam.

2.2   **Cryptocurrency scams** have taken new form, shapes, names, means and identity. However, the aim remains unchanged – scam investors and innocent people as much as possible. Every one of us needs to sit back and just have a holistic and perspective view on crypto scamming and the way it has changed its form. In majority of the cases, scammers identity remains unknown which needs to be exposed.

> FAST FACT Most valid cryptocurrency developers do not market the project's coin. Instead, they post documentation that outlines the cryptocurrency's purpose. If it appears to lack a purpose, it's likely (but not always) a scam. It might be a cryptocurrency just to be a cryptocurrency, similar to **Dogecoin**, which has no official purpose and was advertised as such.

5

NO$CAMCOIN (NSC)

2.3   Crypto Scams: List to Watch in 2024

1.   Imagine a world where artificial intelligence (AI) is not just a tool for progress but a weapon in the hands of scammers. Since 2023, AI crypto scams have become a disturbing reality. These scams use advanced technology to create **fake** endorsements from **celebrities** or simulate real-time market predictions, duping investors into believing they're making a smart move.

2.   But here's the kicker: these AI-driven platforms are often just elaborate ruses to siphon off your funds. To avoid falling prey, keep an eye out for platforms that promise infallible predictions or showcase unnaturally perfect testimonials. In the ever-changing world of AI, scepticism is your best friend.

2.4   What are Crypto Presale Scams?

Crypto presale scams involve selling early access to new cryptocurrencies at seemingly low prices, but often the coins are worthless or the presale itself is entirely fictitious.

2.5   2023 saw a significant drop in value received by illicit cryptocurrency addresses, to a total of $24.2 billion.

Total cryptocurrency value received by illicit addresses, 2018 - 2023
2.6   In addition to the reduction in absolute value of illicit activity, its estimated that the share of all crypto transaction volume associated with illicit activity also fell to 0.34% from 0.42% in 2022.

Illicit share of all cryptocurrency transaction volume, 2018 - 2023
2.7   Some forms of illicit cryptocurrency activity, such as darknet market sales and ransomware extortion, still take place predominantly in Bitcoin. Others, like scamming and transactions associated with sanctioned entities, have shifted to stablecoins. Those also happen to be the biggest forms of crypto crime by transaction volume, thereby driving the larger trend.

NO$CAMCOIN (NSC)

Illicit transaction volume by crime category and asset type, 2023
3. HOW TO IDENTIFY OR DIFFERENTIATE BETWEEN A SERIOUS PROJECT AND A SCAM PROJECT?

3.1   As we delve deeper into the cryptic world of digital currencies, it's paramount to arm ourselves with the knowledge to distinguish a genuine opportunity from a cunning scam. Identifying these scams isn't just about avoiding a financial pitfall; it's about safeguarding your digital journey.

3.2   Let's break down the key indicators that scream "scam" in the crypto world.

1.   Whitepaper Analysis: Scrutinize the project's whitepaper

9

for technical depth, tokenomics, and clear problem-solution fit.

2.   Team Verification: Conduct due diligence on team members, verifying their credentials and track record in the blockchain space.

3.   Smart Contract Audit: Ensure   the   project's   smart contracts have undergone rigorous third-party audits.

4.   Token Distribution: Analyse the token distribution model for fairness and long-term sustainability.

5.   Community Engagement: Assess the project's community channels for genuine engagement and transparent communication.

6.   Development Activity: Monitor   the   project's   GitHub repository or equivalent for consistent development activity.

7.   Team Members: Identify the team members, their social media accounts, LinkedIn profile etc.

8.   Partnerships and Advisors: Verify claimed partnerships and the credibility of listed advisors.

9.   Realistic Roadmap: Evaluate the project's roadmap for achievable milestones and clear development stages.

10.   Tokenomics: Examine   the   token's   utility,   supply mechanisms, and economic model for long-term viability.

11.   Regulatory Compliance: Check for adherence to relevant regulatory frameworks and legal considerations.

3.3   NSC token aims to revolutionize this verification process by creating a decentralized platform where users can collaboratively identify and report suspicious projects, leveraging blockchain technology to ensure transparency and immutability of reported information.

4.   CHALLENGES FACED BY VICTIMS OF CRYPTOCURRENCY SCAMS

4.1   Technical Challenges

1.   Identifying reputable platforms or organizations to assist in fund recovery efforts.

2.   Navigating the complex process of reporting incidents to appropriate law enforcement agencies.

4.2   Resource Limitations

Post-scam, many victims face financial constraints, limiting their ability to pursue recovery or legal action.

4.3   Knowledge and Time Constraints

Reporting cryptocurrency scams often requires extensive research and time investment. Victims may lack the necessary expertise or time to navigate this process effectively.

4.4   Secondary Victimization

1.   Some victims fall prey to recovery scams, where fraudulent entities promise to recover lost funds for a fee, further exacerbating their financial losses.

2.   NSC token addresses these challenges by providing a decentralized, community-driven platform for reporting and verifying scams, as well as accessing resources and support.

5.   HOW TO REPORT A CRYPTO SCAM?

5.1   Taking action against crypto scams isn't just about personal justice; it's about contributing to a safer digital ecosystem. If you find yourself entangled in a crypto scam, don't wallow in despair. Your voice and action can make a difference.

5.2   Here's where to report these nefarious activities:

1.   Commodity Futures Trading Commission (CFTC) at *CFTC.gov/complaint*.
2.   Federal Bureau of Investigation (FBI) at *https://www.fbi.gov/contact-us*.
3.   Federal Trade Commission (FTC) at *ReportFraud.ftc.gov*.
4.   Internet Crime Complaint Centre (IC3) at *ic3.gov/Home/FileComplaint*.
5.   U.S. Securities and Exchange Commission (SEC) at *sec.gov/tcr*.

NO$CAMCOIN (NSC)

5.3   Reporting a scam might feel daunting, but remember, each report is a step towards a safer financial future for everyone. By taking action, you're not just a victim; you're a vital part of the solution.

5.4   NSC token website offers a unique platform for investors and crypto enthusiasts to report crypto scams going around the world. The project aims to 'NAME & SHAME' & 'EXPOSE' the scammers and assist Law enforcements to put them behind bars. Let's bond together to keep the crypto space a fair and safe place to innovate and invest.

6.   HOW TO RECOVER YOUR MONEY BACK FROM A CRYPTO SCAM?

6.1   The harsh reality is that recovering funds lost to a crypto scam is often a Sisyphean task.

6.2   The digital nature of crypto, combined with its decentralized and often anonymous characteristics, creates a unique challenge in tracking and retrieving stolen assets.

6.3   Always report the incident to the relevant authorities. While they may not be able to recover your assets, your report contributes to the larger fight against digital fraud and helps in creating a safer crypto environment for everyone.

6.4   Overall, the axiom "prevention is better than cure" couldn't be more pertinent. The digital world offers incredible opportunities, but it also demands new levels of caution and responsibility.

6.5   Let your experience in the crypto space, good or bad, be a beacon for your future digital journey.

7.   WHAT IS NSC TOKEN AND WILL IT CHANGE THE WORLD FOR THE BETTER?

7.1   NSC token represents a paradigm shift in the crypto-asset landscape, being the first token to implement a decentralized, community-driven fraud detection and prevention mechanism. NSC token employs a novel consensus mechanism that incentivizes community-driven fraud detection and reporting, creating a self-reinforcing security framework.

7.2   The tokenomics of NSC token are designed to create a virtuous cycle of value creation. A portion of the revenue generated is allocated to systematic token buybacks, effectively reducing circulating supply and potentially driving up token value. This mechanism allows token holders to participate in the project's value appreciation indirectly.

7.3   NSC token supports the principles of decentralized finance (DeFi) and individual financial sovereignty. It provides a blockchain-based solution for investors to safeguard their assets against fraudulent schemes. The project's inception is rooted in the collective experience of team members who have encountered and overcome crypto-related fraud

lending authenticity and practical insight to its implementation.

7.4   The issuance of NSC token introduces a new paradigm in decentralized finance. It democratizes access to advanced fraud detection technologies and makes investing in cutting-edge blockchain solutions more accessible to a broader demographic.

8.   HOW WILL NSC TOKEN PRICE APPRECIATE?

8.1   NSC token operates within a self-sustaining ecosystem designed for mutual growth and success. The token's uniqueness lies in its deflationary tokenomics model, which systematically reduces supply while potentially increasing demand. This is achieved through a continuous buyback-and-burn mechanism encoded in smart contracts.

8.2   The appreciation in NSC token's value is intrinsically linked to the token's utility within its ecosystem. As the platform's adoption grows, so does the demand for NSC tokens, potentially driving up their value. This creates a positive feedback loop between the token's utility and its market value.

8.3   Compared to tokens without programmed value appreciation mechanisms, NSC token's unique concept drives price appreciation through both supply-side economics (by decreasing token supply) and demand-side dynamics (by increasing utility and adoption).

9.   IS NSC TOKEN UNIQUE AND WHAT KIND OF ISSUES CAN IT SOLVE?

9.1   The decentralized finance (DeFi) ecosystem faces significant challenges in terms of establishing trust, real value creation, use case implementation, and sustainable product commercialization. While innovative ideas can lead to product design, creation, and marketing, reaching investors who seek trustworthy and reliable tokens requires substantial resources and specialized skills.

9.2   NSC token addresses these challenges by leveraging blockchain technology to create a community-driven platform built on the foundations of transparency, trust, and decentralized governance. By providing a mechanism for reporting and verifying fraudulent activities, NSC token aims to mitigate the risks associated with scams and rug pulls in the crypto space.

14

10.   IS IT WORTH ACQUIRING NSC?

10.1 The cryptocurrency market is witnessing an influx of new investors and the proliferation of advanced trading technologies. Automated systems and trading bots, once the domain of large financial institutions, are becoming increasingly accessible. Web-based platforms are replacing traditional desktop applications, enabling trading across various devices.

10.2 Asset tokenization is opening up new avenues for fractional ownership and investment in diverse projects and properties. Decentralized exchanges (DEXs) and advanced trading software are gaining prominence, with technology providers focusing on user experience while leaving trade execution to exchange protocols.

10.3 Cryptocurrency exchanges are exploring partnerships with intermediaries and technology providers. Many exchanges offer API integration capabilities and incentive structures for partners involved in customer acquisition and service. NSC token leverages these market dynamics to enhance its value proposition. By supporting projects that generate revenue from the expanding crypto market, NSC token creates a positive feedback loop of growing revenue and increasing allocation towards improving the token's value.

11.   TOKEN ECONOMICS

11.1   WHY IS ACQUIRING NSC TOKEN PROFITABLE?

NSC token implements a deflationary tokenomics model with a continuous buyback-and-burn mechanism, creating a positive feedback loop for token value appreciation. The buyback-and-burn protocol is designed to systematically increase NSC token's intrinsic value by enhancing its economic potential. Early adopters may potentially benefit from the differential between their acquisition price and the token's future market value.

11.2   TOKEN HOLDERS' COMMUNITY

1.   NSC token holders are granted governance rights within the NSC ecosystem. Each token represents one vote, allowing holders to participate in crucial decision-making processes, such as selecting and ranking reported scam projects. This democratic approach ensures that the community plays an active role in shaping the project's direction and maintaining the integrity of the anti-scam database.

NO$CAMCOIN (NSC)

2. The NSC community will play a pivotal role in shaping the future of the NSC ecosystem. The NSC token value is directly correlated with its community base, their involvement, and the network effects they generate. Active participation in the NSC community will substantially contribute to the token's value appreciation.

3. As a NSC token holder, you become part of a global initiative aimed at combating cryptocurrency fraud. Your participation and vigilance in identifying and reporting suspicious activities contribute to the overall security and trustworthiness of the crypto ecosystem.

12. PROJECT ROAD MAP

The NSC token development trajectory incorporates agile methodologies and iterative deployment strategies to ensure optimal platform evolution. Key milestones include:
12.1 PRIVATE SALE – 6% (60 MILLION NSC TOKENS)

6% (60,000,000 tokens) of the NSC token supply is reserved for Private sale for early supporters, community members, accredited strategic

investors, investment funds and venture capital (VC) investors. The policies related to AML and KYC will be strictly adhered to. The investors privacy will be maintained while meeting regulatory requirements by incorporating decentralized KYC.

12.2 PRE-SALE SALE – 20% (200 MILLION NSC TOKENS)

NSC token Pre-sale begins post completion of Private sale phase. The distribution of 200 Million tokens in Pre-sale will be as follows:

1. Stage 1: 7 days & 10% allocation (20,000,000 NSC TOKENS)

2. Stage 2: 11 days & 20% allocation (40,000,000 NSC TOKENS)

3. Stage 3: 14 days & 25% allocation (50,000,000 NSC TOKENS)

4. Stage 4: 14 days & 25% allocation (50,000,000 NSC TOKENS)

5. Stage 5: 15 days & 20% allocation (40,000,000 NSC TOKENS)

The date, time and token price for starting Pre-sale will be declared on NSC token website, social media channels like Facebook, X, Telegram and Instagram only after successful completion of Private sale.

12.3 PUBLIC SALE – 10% (100 MILLION NSC TOKENS)

Public Sale will be held for 14 days wherein 100 Million NSC tokens will be up for sale. The date, time and price will be declared on NSC token website and social media channels like Facebook, X, Telegram and Instagram only after successful completion of pre-sale.

12.4 MARKETING – 7% (70 MILLION NSC TOKENS)

70 Million NSC tokens have been allocated for implementing a comprehensive marketing strategy to drive adoption and awareness.

12.5 RESEARCH & DEVELOPMENT (R&D) – 6% (60 MILLION NSC TOKENS)

60 Million NSC tokens have been allocated to ensure NSC token

remains at the forefront of technological advancements in the crypto ecosystem as time progresses.

12.6 REWARDS & STAKING PROGRAM – 14 % (140 MILLION NSC TOKENS)

1.   Staking NSC -   Early investors and supporters will have the opportunity to stake their NSC tokens before the official listing, benefiting from high initial Annual Percentage Yield (APY). The staking rewards will be distributed over a two-year period.

2.   1 Year Staking -   60% Tokens (84 Million NSC) will be distributed to all those investors who stake NSC in staking pool thus rewarding them for contributing to overall security of NSC.

3.   2 Year Staking -   40% Tokens (56 Million NSC) will be distributed to all those investors who stake NSC in staking pool for 2 years, albeit at a slightly higher rate of APY. This strategy guarantees the continuation of ongoing rewards to the community for its participation while also adapting to the changing dynamics of the project as per the market.

4.   Staking BNB -   Users will have an option to stake BNB and earn NSC tokens, thus contributing to NSC token ecosystem's growth and receiving rewards in return. The stakeholders will be granted governance and voting rights in the system, thus helping the project's direction and future development.

6.   Rewards -   Users who will report about fake scams, fake pre-sales and any bugs, will be rewarded with NSC tokens.

12.7 LIQUIDITY – 16% (160 MILLION NSC TOKENS)

16% NSC tokens are reserved for liquidity purpose on CEX and DEX, and are fully unlocked at the TGE. This strategy ensures that sufficient liquidity is provided for the token and that promotional activities can commence immediately.

12.8 ADVISORS / MENTORS – 6.5% (65 MILLION NSC TOKENS)

6% of the NSC token supply is allocated for advisors, designers, developers, influencers and mentors who can provide valuable guidance and strategic insights.

NO$CAMCOIN (NSC)

12.9 COMMUNITY FUND FOR LOPECOIN SCAM VICTIMS – 4% (40 MILLION NSC TOKENS)

NSC token is a concept, an idea that took birth because of one reason and that is LOPECOIN SCAM. 4% of the NSC token supply (40,000,000) is reserved to be distributed to victims of the LOPECOIN scam, subject to due diligence, transaction verifications and KYC procedures, if required. Balance tokens thereafter will be added to liquidity.

12.10 CORE TEAM – 10.5% (105 MILLION NSC TOKENS)

1.   105 Million NSC Tokens have been distributed among team members (@1.75% per member i.e. 17,500,000). The team members tokens will be locked for 1 year and will be linearly unlocked over 10 years such that it does not affect the market price of NSC token. By gradually releasing these tokens, the core team can transparently plan long-term development, operations and governance without the risk of sudden large sell-offs.

2.   NSC token is the first cryptocurrency project where the tokens of the core team will be unlocked over 10 years which is 4 yrs plus compared to industry practices. NSC token is creating a new benchmark by taken maintaining transparency, integrity and clarity, thus setting up very high standards as far as morals and ethics in cryptocurrency world.

12.11 VESTING PERIOD

1.   NSC token has a vesting period for the below groups:

a. Team   - 1 year

b. Private sale investors - 100% till TGE / token listing date. Only 10% tokens unlocked on listing date. Balance 90% tokens vested for 6 months. Thereafter, 6% tokens will be unlocked linearly over next 15 months.

c. Advisors   - 1 year

d. Pre-sale investors   - Until token listing date. Option to stake will be available as well.

NO$CAMCOIN (NSC)

e. Public sale investors   - Until token listing date. Option to stake will be available as well.

2.   The above vesting period is to prevent dumping by core team, advisors, and private investors.

3.   NSC token doesn't have any vesting period for public sale participants.

12.12 TOKEN CLAIM / TOKEN DISTRIBUTION / TGE

1.   Private sale buyers will be able to claim 10% of their vested NSC tokens prior to the CEX and DEX listing date, thus maintaining a fair launch and avoid selling pressure. This will foster trust and ensure sustainability of the project. (Based on Whitepaper section 12.11 (b))

2.   NSC tokens for Pre-sale and Public sale investors / buyers are fully unlocked at the TGE and will be available for claiming prior to the listing date. (Based on Whitepaper section 12.11 (b)). Token distribution / token claim will commence 24 to 48 hrs before listing on CEX & DEX.

12.13   CEX & DEX LAUNCH

1.   NSC token's genesis can be traced to a fraudulent pre-sale event involving LOPECOIN. In response, a consortium of affected investors coalesced to architect a solution, giving birth to the NSC project. NSC token's primary objective is to provide a decentralized platform for logging and verifying fraudulent projects, tokens, and associated digital footprints, thereby assisting global law enforcement agencies in their pursuit of bad actors within the crypto space.

2.   NSC token will be eyeing to get listed on major Tier-1 & Tier-2 CEXs and DEXs on the BNB Smart Chain after the successful completion of NSC token sale. The NSC tokens will be tradeable immediately and there will not be any restrictions. The listing date will be announced on NSC's official website and social media channels like Facebook, X, Telegram and Instagram.

12.14 CREATION OF NSC APP & CRYPTO WALLET

NSC token project further aims to develop its own mobile application (supporting Android & Apple mobile devices) and self-

custodial WEB3 crypto wallet supporting all blockchains aimed primarily at storing cryptocurrencies and dedicated personalization by incorporating multiple layers of security.

12.15 NFT KEMAL Isik

Kemal Isik is a notorious scammer who duped LopeCoin investors. NSC will also launch Kemal Isik NFTs and collectibles.

13. TECHNICAL DETAILS

13.1 Blockchain & Standard: BNB Smart Chain (BSC) - BEP-20

13.2 Smart Contract Address:

0x76fe67B6b6024A9d44BFF6838224D467386135D0

13.3 Token Ticker: NSC

14. TOKEN MECHANISM

The NSC token is built on the BNB Smart Chain, adhering to the BEP-20 standard.

15. TECHNICAL DESCRIPTION OF THE TOKEN

15.1 NSC token will be a BEP-20 standard token on Binance Smart Chain (BSC). Blockchain BSC offers the implementation of smart contracts, which will be part of our further development (programmable deflation and lock-ups of specific tokens). Binance's smart contracts are transparent and straightforward, and transactions are quick – the confirmation comes in 15 seconds. Furthermore, the implemented smart contracts will not have any embedded limitations.

15.2 The embedded ecosystem will provide a competitive advantage over other tokens (deflation). In subsequent stages of project development, there are plans to perform partial or complete migration to other blockchains or create our blockchain.

16. WHAT IS BNB SMART CHAIN (BSC)?

BNB Smart Chain (BSC) or Binance Smart Chain is best described as a blockchain operating in parallel to Binance Chain . Unlike Binance Chain, BSC is an Ethereum Virtual Machine (EVM) compatible and smart contract supporting blockchain for DeFi, NFT, GameFi, Metaverse and other Web3 projects. The project aims to leave the high Binance Chain capacity intact while introducing smart contracts into the ecosystem.

17. TOKEN CODE

17.1 The NSC token smart contract is written in Solidity, the native smart contract language of the BNB Smart Chain. The code adheres to industry best practices for smart contract design and has undergone rigorous security audits. The NSC project will be duly registered for license and subjected to independent audit and KYC.

17.2 Professional Image: As a initiator of a successful open source project, NSC token will be identified as the industry leader in a revolution to fight against scam coins, scam pre-sales and scam projects.

18. LIMITED SUPPLY

The total supply of NSC token is capped at 1 BILLION (1,000,000,000), with this limit immutably encoded in the smart contract to ensure programmatic scarcity.

19. STRATEGY FOR UNSOLD TOKENS

The unsold NSC token from Private Sale, Pre-Sale and Public Sale will be added to the overall Liquidity. NSC token smart contract does not implement any token burn strategy to decrease total supply. To mitigate potential price volatility, NSC token has incorporated strong Vesting schedule for Team and Private sale investors. Hence, NSC token total supply on the day of listing will be 1 BILLION.

20. ANTI-FRAUD LABELING SYSTEM

If an account/address is hacked, the account owner can add a label to its account which causes all addresses from that account to be automatically labelled over blockchain, so exchanges and traders will not process any transaction that is labelled.

21. LONG TERM DEVELOPMENT

The NSC project is well funded and has worked out a strategy on which the roadmap is laid down for the future developments akin to the changing dynamics. Hence, NSC will maintain the pace with the crypto innovations by hiring professionals, developers and advisors.

22. KEY PERSONS

The NSC token project is spearheaded by a team of crypto enthusiasts,

NO$CAMCOIN (NSC)

entrepreneurs', developers and cyber security experts who bring specialized skills in areas crucial to the project's success, including smart contract development, investment strategy, marketing, and security.

23.   SOCIAL NETWORK & CHANNELS

- https://www.facebook.com/profile.php?id=61563850717758&mibextid=ZbWKwL

24.   LIMITATION OF LIABILITY

24.1   In no event will NSC, its officers, shareholders, employees, agents, directors, subsidiaries, affiliates, successors, assigns, suppliers, or licensors be liable for any loss or damages, including without limitation, direct, indirect, special, consequential, or punitive loss or damages, arising from or related to your use of NSC, whether in an action of contract, tort or otherwise, and regardless of whether such damages were foreseeable and whether or not NSC was advised of the possibility of such damages.

24.2 Without limiting the generality of the foregoing, NSC takes no responsibility for and will not be liable for any financial or other loss or damages arising from or related to the use of NSC, including, without limitation, to any of the following: (i) delays, interruption or loss of services; (ii) technical failure, malfunction or shutdown; (iii) server failure, hacks or unavailability; (iv) data loss; (v) corrupted data on NSC's servers; (vi) failure to update or provide correct information; (vii) "phishing" or other websites masquerading as NSC; (viii) stolen, lost, or unauthorised use of your means of authorization; (ix) loss of business or goodwill.

24.3 The limitation of liability set out above shall not be applicable in case of loss or damages caused by **NSC** or any of its employees by intentional misconduct or gross negligence.

24.4 **NSC** supports or is integrated with third party services. **NSC** takes no responsibility for any third-party services and will not be liable for any loss or damages caused by such third-party services.

24.5 **NSC** is provided on an "as is" and "as available" basis without any representation or warranty of any kind, whether express or implied, to the maximum extent permitted by applicable laws. **NSC** disclaims any implied warranties of title, merchantability, fitness for a particular purpose and/or non-infringement.

25. LEGAL DISCLAIMER AND DISCLOSURES REGARDING ASSOCIATED RISK

25.1 This White Paper is for information purposes only and may be subject to change. Cryptocurrency trading may not generally be appropriate, particularly with funds drawn from retirement savings, student loans, mortgages, emergency funds, or funds set aside for other purposes. Cryptocurrency trading can lead to large and immediate financial losses. The volatility and unpredictability of the price of cryptocurrency relative to fiat currency may result in significant loss over a short period of time. Transactions in cryptocurrency may be irreversible, and, accordingly, losses due to fraudulent or accidental transactions may not be recoverable.

25.2 Purchasing cryptocurrencies comes with a number of risks like:

1. **Volatile Market** : Cryptocurrency prices can experience extreme fluctuations or flash crashes over short periods.

2. **Regulatory Uncertainty**: The regulatory landscape for cryptocurrencies is evolving and varies by jurisdiction.

3. **Technical Risks**: Smart contracts and blockchain networks may have vulnerabilities or experience technical issues.

4. **Liquidity Risks**: Cryptocurrency markets may face liquidity constraints, impacting the ability to buy or sell assets.

5. **Cybersecurity Threats**: Digital assets are susceptible to

NO$CAMCOIN (NSC)

hacking, theft, and other security breaches.

25.3 You acknowledge and agree that NSC does not provide any advice, guidance, or recommendations on the opportunity to invest into, disinvest from, or remain invested in any currency or asset nor it constitutes any financial advice, an offer to sell securities, shares, rights or a solicitation for investment belonging to NSC token or any related or associated company nor contains any information or indication that might be considered as a recommendation or that might be used to base any investment decision. If you are considering purchasing an asset of any kind as an investment, you should first contact your financial advisor for any such advice, guidance, or recommendation.

25.4 The NSC team makes no representations or warranties regarding the accuracy or completeness of the information presented herein. Participation in the NSC ecosystem is at the sole risk of the participant.

25.6 Potential participants acknowledge that they understand and accept associated risks, including the potential for complete loss of value or functionality of NSC tokens. Hence, participants must conduct their own due diligence and seek professional advice before making any investment decisions i.e DYOR (DO YOUR OWN RESEARCH).

25.7 NSC holds no liability or accountability for damages of any kind arising out of the use, reference to or reliance on the contents of this White Paper, even if advised of the possibility of damages arising.

25.8 No regulatory authority has examined or approved any of the information set out in this White Paper. No such action has or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this White Paper does not imply that applicable laws or regulatory requirements have been complied with.

25.9 This document is intended for people who have experience in purchasing blockchain tokens. If you have not regularly participated in prior token sales, nor fully understand risks associated with it, it is strongly advised against participating in the NSC token sale. Each participant fully accepts any risks associated in the process of the token sales, distribution and accepts that no guarantees will be made for the tradability of the token, nor protection against the exposure of volatility which may occur, resulting in a large difference in the value between the purchase date and the date NSC tokens are

NO$CAMCOIN (NSC)

tradable. By participating in the NSC token sale and by acquiring it you acknowledge that the primary function of the NSC token is enabling the NSC Ecosystem, and not being a value storage asset.

25.10 Also, you accept that blockchain tokens inherently come with great risks, such as loss of value, theft, hacking or other complete loss of tokens, loss of usability and security and other weaknesses in NSC token or third-party software. Please be aware that it is your own responsibility to adequately hold, store and trade the NSC tokens, for instance by choosing a compatible secure EVM supporting wallet. If you do not fully understand these risks and obligations, we encourage you to get informed or obtain relevant counsel or to abstain from any involvement.

25.11 NSC will not be available for sale, purchase, auction or to trade in any form in 22 countries which have outrightly banned cryptocurrency use and transactions within their borders. In case of any country getting included or removed from this list, the same will be updated accordingly. In case, any person or persons from the banned countries are found to be in possession of NSC tokens or holding them in their self-custodial crypto wallets like MetaMask or Trust Wallet or any other Web3 wallet, NSC team will not be held responsible and subject to any legal actions whatsoever according to that country.

26. INTELLECTUAL PROPERTY RIGHTS

26.1 You acknowledge and agree that NSC retains all rights, title, and interest in and to all copyrights, trademarks, trade secrets, patents, and any other proprietary rights in NSC it's airdrop, and all content therein. You acknowledge and agree that "NSC", their trademarks, service marks, logos and graphics are the registered trademarks or trademarks of NSC.

26.2 You are not permitted to create, for commercial use, fan art (digital or physical), merchandise, or similar content stemming from NSC and its affiliated links and projects.

27. USER REPRESENTATIONS

You acknowledge and agree that NSC does not provide any advice, guidance, or recommendations on the opportunity to invest into, disinvest from, or remain invested in any currency or asset. If you are considering purchasing an asset of any kind as an investment, you should first contact your financial advisor for any such advice, guidance, or recommendation. By participating in NSC, you warrant that you are a bona fide participant of NSC. By participating in NSC you confirm that you will not use NSC's Services in connection with any of the following businesses, activities, practices or items, or any criminal activities whatsoever, including but not limited to:

27.1 Terrorist Financing

27.2 Money Laundering

NO$CAMCOIN (NSC)

27.3   Illegal Gambling

27.4   Distributing or funding drugs and drug paraphernalia;

27.5   Malicious hacking including payments for ransomware;

27.6   Any business activity we believe poses elevated financial risk, including legal liability, pyramid schemes, network marketing, and referral marketing programs;

27.7   Knowingly or recklessly providing us with inaccurate or incomplete information through NSC.

27.8   Reverse engineering, disassembling, or otherwise attempting to construct, copy, or replicate NSC's source code, formulas, or processes;

27.9   Interfering with the security of NSC or the safe use of NSC by others (including without limitation by way of distributing viruses, corrupted files, or other similar software or programs that may damage the operation of any computer hardware or software or which are otherwise directed at NSC or its users);

27.10 Using this Airdrop for any purpose that is unlawful or prohibited or in a way which infringes the intellectual property rights or other rights of any person (including us);

27.11 Knowingly or recklessly using and/or taking advantage of a technical or technological error, loophole, or glitch on NSC's Airdrop and Services;

27.12 Using NSC or the information contained in it for commercial purposes which are competitive to NSC or our business or which would otherwise be detrimental or prejudicial to our interests in any way;

27.13 Using systematic, repetitive, or other related methods which are designed to generate or obtain repetitive and repeated amounts of data or other information from or to NSC or which may otherwise place an unreasonable load on the infrastructure of NSC;

27.14 Publishing, posting, distributing, disseminating, or sending 'spam material' or engaging in any communication that is offensive, false, unlawful, defamatory, indecent, unfair or inappropriate in any way to others, which would reasonably be considered 'spam' or which is deliberately false, misleading, or deceptive (or likely to mislead or deceive);

NO$CAMCOIN (NSC)

27.15 Collecting or storing personal data about other users of **NSC**; or

27.16 Doing anything else which may interfere with or negatively affect the operation of our Airdrop, Services, or other users.

28. PROHIBITED ACTIVITIES

You may not access or use the **NSC** for any purpose other than that for which we make it available for. **NSC** may not be used in connection with any commercial endeavours except if agreed to in a binding legal contract with **NSC**. The prohibited activities with regards to **NSC** include, but are not limited to:

28.1 Systematically retrieving data or other content from **NSC** to create or compile, directly or indirectly, a collection, compilation, database, or directory without written permission from us; Using **NSC** in any unauthorised manner, including collecting usernames and/or email addresses of users by electronic or other means for the purpose of sending unsolicited email, or creating user accounts by automated means or under false pretences;

28.2 Using a buying agent or purchasing agent to make purchases on **NSC**;

28.3 Using **NSC** to advertise or offer to sell goods and services; Circumventing or disabling or otherwise interfering with security-related features of **NSC**, including features that prevent or restrict the use or copying of any Airdrop content or enforce limitations on the use of **NSC** and/or the content contained therein; Engaging in unauthorised framing of or linking to **NSC**;

28.4 Defrauding or misleading us and/or other users, especially in any attempt to learn sensitive account information such as user password; Improperly using our support services or submitting false reports of abuse or misconduct;

28.5 Engaging in any automated use of the system, such as using scripts to send comments or messages, or using any data mining, robots, or similar data gathering and extraction tools;

28.6 Interfering with, disrupting, or creating an undue burden on **NSC** or the networks or services connected to **NSC**;

28.7 Attempting to impersonate another user or person or use the username of another user;

28.8   Selling or otherwise transferring your profile.

28.9   Using any information obtained from NSC in order to harass, abuse, or harm another person;

28.10 Use of NSC as part of any effort to compete with us or otherwise use Airdrop and/or the content contained within for any revenue-generating endeavour or commercial enterprise;

28.11 Deciphering, decompiling, disassembling, or reverse engineering any of the software comprising or in any way making up a part of NSC;

28.12 Attempting to bypass any measures of NSC designed to prevent or restrict access to NSC, or any portion of it;

28.13 Harassing, intimidating, or threatening any of our employees or agents engaged in providing any portion of NSC to you;

28.14 Deleting copyright or other proprietary rights notice from any content from or derived from NSC;

28.15 Copying or adapting NSC's software, including, but not limited to HTML, JavaScript, or other code;

28.16 Uploading or transmitting (or attempting to upload or to transmit) viruses, Trojan horses, or other material, including excessive use of capital letters and spamming (continuous posting of repetitive text), that interferes with any party's uninterrupted use and enjoyment of NSC or that modifies, impairs, disrupts, alters, or interferes with the use, features, functions, operation, or maintenance of NSC;

28.17 Uploading or transmitting (or attempting to upload or to transmit) any material that acts as a passive or active information collection or transmission mechanism, including, without limitation, clear graphics interchange formats ("GIFs"), 1×1 pixels, web bugs, cookies, or other similar devices (sometimes referred to as "spyware" or "passive collection mechanisms" or "PCMs");

28.18 Except as may be the result of standard search engines or Internet browser usage, using, launching, developing, or distributing any automated system, including, without limitation, any spider, robot, cheat utility, scraper, or offline reader that accesses NSC, or using or launching any unauthorised script or other software;

28.19 Disparaging, tarnishing, or otherwise harming, us and/or NSC,

such harm which is assessed and judged at our sole discretion and opinion; and

28.20 Using **NSC** as a minor (under the age of 18 years old). Using **NSC** in a manner inconsistent with any applicable laws or regulations.

29. <u>TAXES</u>

You shall be solely responsible for any taxes applying to the payments you make or receive through **NSC**, and to collect, report, and remit such taxes to the appropriate tax authorities. You acknowledge and agree that, at the moment, **NSC** is not able to draft a taxation report concerning the operation executed and that it is your duty to collect all the information required by the competent tax authorities in order to comply with your tax obligations in your country as per the regulations.

30. <u>INDEMNIFICATION</u>

To the fullest extent permitted under applicable laws, you agree to hold harmless and indemnify **NSC**, its officers, shareholders, employees, agents, directors, subsidiaries, affiliates, successors, assigns, suppliers, or licensors from and against all third-party claims and all liabilities, damages, assessments, losses, costs, or expenses (including reasonable attorney fees) resulting from or arising out of:

30.1 Your alleged or actual breach of these Terms, including, without limitation, Your express representations and warranties;

30.2 Your alleged or actual use or misuse of the Services; and

30.3 Your alleged or actual infringement or violation of any laws or of the rights of a third party.

31. <u>FORCE MAJEURE</u>

NSC will not be deemed in default of these Terms to the extent that performance of its obligations is delayed or prevented by reason of any external force including, without limitation, war, insurrections, bank failures, strikes, fires, floods, earthquakes, labour disputes, epidemics, governmental regulations, freight embargoes, natural disaster, act of government or any other cause beyond **NSC's** reasonable control.

32. <u>LOPECOIN SCAM</u>

LopeCoin committed serious fraud and scam with all investors.

On 1ˢᵗ July 2024, the token was to be listed, but instead the team ran away and remained incommunicado for 2 months. In this period, NSC team came together and started working to create a scam-free ecosystem for the common people and investors. Let's have a look at how LopeCoin website looked then and now. LopeCoin has now created a new website with new name, posted few messages on X with the same agenda and desperation to scam people again.

NO$CAMCOIN (NSC)
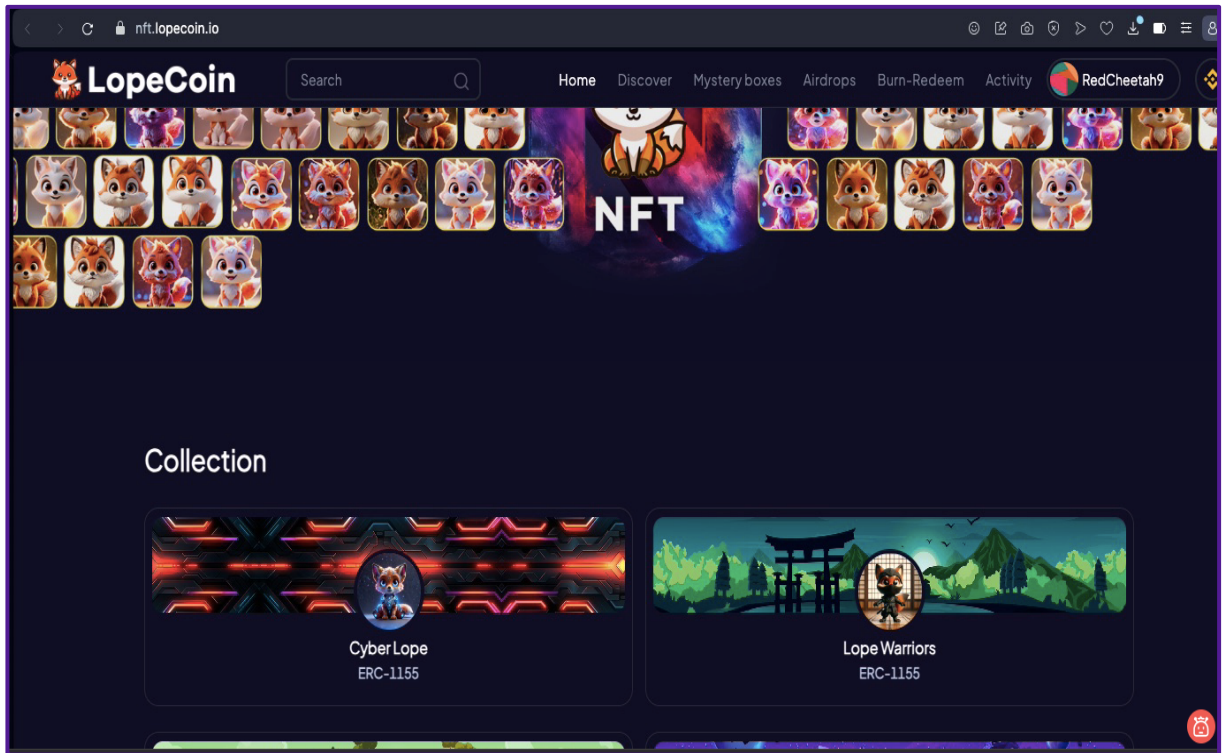

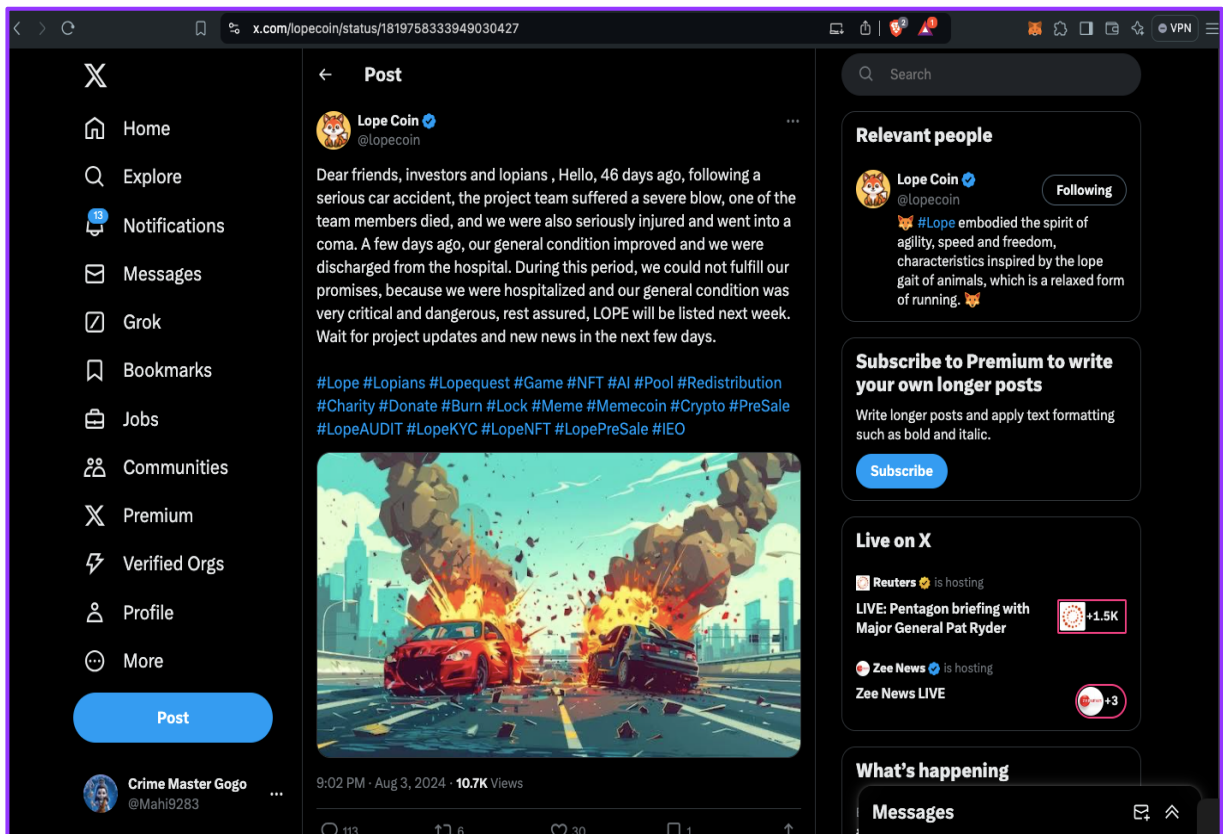

Sep 6, 2024: LopeCoin Post on X.com

This post on https://x.com/lopecoin seems an act of desperation and a step to avoid getting arrested by Law Enforcement agencies and wrath of investors

NO$CAMCOIN (NSC)

by gaining sympathy stating about tragic incident involving car accident. The Posts on this message reflect the sentiments of the investors.
